Sector A : SERVICES

Register issued on : 2021-03-05

**Subsector A01: TOURIST SERVICES**

---

**Subsector :** A01 **Registration Date :** 2021-02-15  
**Organization :** UNE  
**Country :** Spain **Latest Date for Comments :** 2021-03-15  
**Project ID :** P0053893/0001 **Draft for public enquiry**  
**ICS :**  
**National Ref :** PNE 178503  
**Title :** Semantics applied to smart tourism destinations.  
**Scope :** This standard defines a base semantics that allows to represent the relevant information in which the tourist destination is formed (tourist destination, tourist resources within the destination, travel experiences), ensuring - through its use - the interoperability of its tourist platforms and the city and territory among themselves and with third-party developments. This standard provides the tourist activity with a semantic data structure that makes it easier for developers to work, allows all actors to take full advantage of current technological potential, and facilitates the tourist that uses the destination platforms to access relevant information in an intuitive and agile way.  
 This revision includes new taxonomies and vocabularies to the norm related to safety in cases of pandemic.

**Relatedness :**

**National :** REV/AMD UNE 178503:2019

---

**Subsector :** A01 **Registration Date :** 2021-02-15  
**Organization :** UNE  
**Country :** Spain **Latest Date for Comments :** 2021-03-15  
**Project ID :** P0054846/0001 **Draft for public enquiry**  
**ICS :**  
**National Ref :** PNE 178502  
**Title :** Indicators and tools of smart tourist destinations.  
**Scope :** This standard specifies a set of indicators and tools, associated with the governance and the axes of an intelligent tourist destination (governance, innovation, technology, universal accessibility, sustainability), for its application in the management of intelligent tourist destinations, so that efficiently serve for decision-making by the managing body of the destination and by those responsible for the processes or activities affected and, consequently, contribute to the improvement of the destinations.

In line with the introduction of the UNE 178501 standard, the objective of this standard is to provide a logical framework of work for managers of tourist destinations, which not only improve their management systems, processes and documentary records, but providing them with a battery of indicators and tools that allow them to interact with tourists and obtain information during all phases of the tourist trip cycle.

This standard establishes a logical model applicable to any tourist destination that undertakes a process of digitization and technification of its processes and services, as well as a measurement of its performance in a comparable and verifiable way, regardless of its size and location.

This standard has been designed to be used in conjunction with the UNE 178501 Standard, although it can also be used independently.

 ICS : 91.060.50  
 National Ref : ÖNORM B 5312  
 Title : Wooden windows and wooden-aluminium windows - Construction Rules  
 Scope : The present Austrian Standard defines construction rules for wooden windows and wooden-aluminium windows in form of fixed windows, bottom hinged and side/bottom hung sash windows, designed as single windows with insulating glass, composite windows and countersash windows. The profiles of these windows are made of wood as well as, if necessary, with aluminium wall linings. This ÖNORM does not apply to windows inside of buildings which are subject to the act on monument protection or which are of decisive importance for the townscape. This ÖNORM does not cover the repair of windows. Furthermore, windows to which requirements for fire resistance and/or smoke control and/or burglar resistance are specified, as well as roof windows and curtain wallings, are not dealt with by this ÖNORM.

**Title :** Requirements for roof building - Part 5: Flat roofs  
**Scope :** This standard specifies the requirements for flat roof building structure and main requirements for the materials used in flat roofs. This standard specifies the requirements for products and installation in ordinary exploitation conditions. Flat roofs are roofs where incline is 1:10 or less. Flat roofs are usually covered with flexible sheets for waterproofing or continuous waterproofing. This standard does not specify continuous waterproofing. This standard is meant for guidance to flat roof installers, builders, material manufacturers, designers, architects, building supervision, experts and users. The examples in this standard are illustrative and it is not inevitably obligatory to use them. Designers may design different solutions. The roof maintenance is specified in standard EVS 920-1. The fire safety design of flat roofs is specified in EVS 812 standard series.

**Established**  
**ICS :** 13.160  
**National Ref :** ÖNORM ISO 2631-1  
**Title :** Mechanical vibration and shock - Evaluation of human exposure to whole body vibration - Part 1: General requirements ISO 2631-1:2010/A1)  
**Scope :** This part of ÖNORM ISO defines procedures for the measurement of periodic, random and transient whole-body vibrations. It specifies the main factors that together determine the extent to which a vibration will be permissible. Informative appendices reflect the prevailing doctrine and contain information about the possible effects of vibrations on health, well-being, perceptibility and kinetosis. The frequency range considered is 0.5 Hz to 80 Hz for health, well-being and perceptibility and 0.1 Hz to 0.5 Hz for kinetosis. While it does not address the potential impact on human performance, most of the guidance on whole-body vibration applies to this area as well. This standard also specifies the preferred methods for coupling vibration sensors to determine the effects of vibration on humans. It does not apply to the evaluation of individual, extreme impacts, such as those that occur in vehicle accidents. The standard is applicable to movements that are transmitted to the human body as a whole via the support surface: the feet of a standing person, the buttocks, back and feet of a seated person or the support surface of a person lying down. This type of vibration occurs in vehicles, in work machines, in buildings and in the vicinity of machines.

PNE 81753-1

**Title :**

Workplace exposure. Determination of inorganic acids by ion chromatography - Part 1: Non-volatile acids (sulfuric acid and phosphoric acid).

**Scope :**

This standard describes the procedure and equipment for the determination in the airborne at the workplace, of the anions of sulfuric acid and phosphoric acid and their mixtures, through the sampling on a membrane filter and the subsequent analysis by ion chromatography. This method is applicable to the determination of the inhalable fraction of airborne particles defined in UNE-EN 481, provided that the appropriate sampler is used. The procedure of measurement described can be used to carry out measurements to determine the occupational exposure concentration, measurements for comparison with limit values (occupational) to evaluate the exposition via inhalation and periodic measurements. It may also be used to carry out screening measurements of time weighted average concentration (see UNE-EN 482, 4.2) and screening measurements of variation of concentration in space (see UNE-EN 482, 4.3). It cannot be used to measure instantaneous concentrations or fluctuations of the concentration in short periods of time.

**Title :**

Drinking water heating systems - Microbiological requirements for water quality and its monitoring

**Scope :**

This ÖNORM defines hygienic requirements for operation, monitoring and rehabilitation with regard to achieving and maintaining the water quality of drinking water heating systems. The aim of this ÖNORM is, that the water is not adversely affected microbiologically

---

by the drinking water heating system. The purpose of the routine controls provided for in this ÖNORM is to provide regular information on the quality of the water provided for human consumption, as well as information on the effectiveness of the DHW heating system, in order to determine whether the water intended for human consumption complies with the legal requirements and corresponds to the state of the art. The indicator function of parameters, which are used in laws and standards, serves to ensure that, if certain values are exceeded, remedial measures for the restoration of water quality serve to protect human health. The requirements of this ÖNORM B 1921 are based on International, European and National laws, regulations, guidelines, standards, recommendations as well as research results and practical experience. There are, for example, recommendations and guidelines of the World Health Organization - WHO, the European Center for Disease Prevention and Control - ECDC, COUNCIL DIRECTIVE 98/83 / EC of 3 November 1998 on the quality of water intended for human consumption - Drinking Water Directive (DWD), the German Drinking Water Regulation - TrinkwV 2001, the Austrian Drinking Water Regulation - TWV and the Austrian Food Book - LMB Chapter B1 drinking water.

## Sector H: Products for household and leisure use

Subsector	Title	ISO/TC reference	CEN/TC reference
H01	Cinematography	36	372
H02	Photography	42	/
H03	Consumer questions	/	291
H04	Sports equipment	83	136
H05	Oil and gas burners	/	47; 131
H06	Horology	114	/
H07	Space heating	116	62; 110; 130; 179; 180
H08	Sizing systems	133; 137	/
H09	Furniture	136	207
H10	Sewing machines	148	/
H11	Heater controls	161	58
H12	Ceramic and glass-ware for food	166	/
H13	Jewellery	174	CEN/WS 047
H14	Caravans	177	245
H15	Toys	181	52
H17	Oil stoves	/	46
H18	Central heating boilers	/	48; 57; 109; 269
H19	Non-electric cookers and barbecues	/	49; 281; 295
H22	Smokers' lighters and matches	/	355; 87
H23	Ladders	/	93
H24	Tactile danger warnings	/	/
H25	Large gas appliances	/	106; CEN/CLC/JWG FCGA
H26	Sealing materials	/	108; 208
H27	Educational equipment	/	/
H28	Hunting	191	/
H29	Heat pumps	/	113
H30	Equipment for children	/	252
H31	Dedicated LPG appliances	/	181
H32	Culinary utensils	186	194
H33	Footwear (excluding protective footwear)	/	309
H34	Child safety	/	CEN/BT/WG 117 398
H99	Undetermined	/	299; 364; 369; 402

## Sector I: Mechanical engineering

Subsector	Title	ISO/TC reference	CEN/TC reference
I01	Screw threads	1	/
I02	Fasteners	2	185
I03	Limits & fits	/	/
I04	Rolling bearings	4	/
I05	Iron pipes	5	203
I06	Pressure vessels	11	54
I07	Shafts	14	/
I08	Agricultural machines	23	144, 334
I09	Small tools	29	213
I10	Splines	/	/
I11	Machine tools	39	142; 143; 145; 255
I12	Pulleys & belts	41	188
I13	Gas containers	58	23; 286
I14	Gears	60	/
I15	Equipment for petroleum industry	67	12
I16	Internal combustion engines	70; 192	270
I17	Machinery in general (including safety)	72; 199	114; 153; 214; 313 271, 337; 399; 397 CEN/WS 025
I18	Mining	82	196
I19	Nuclear energy	85	/
I20	Refrigeration	86	44; 182
I21	Chains and chain wheels	100	/
I22	Vacuum technology	112	/
I23	Pumps	115	197
I24	Industrial fans	117	356
I25	Compressors	118	232
I26	Plain bearings	123	/
I27	Earth moving and construction equipment	127; 195	151
I28	Fluid power	131	/
I29	Gas cleaning	/	195
I30	Air distribution	/	156
I31	Valves	153; 185	69; 236; 105
I32	Flanges	/	74
I33	Information processing in automation	184	310
I34	Non-ferrous metallic pipes	/	/

I35	Leisure and recreational machines	/	152
I36	Thermoprocessing technology	/	186
I37	Printing and paper machines	/	198
I38	Leather production, tannery and related machinery	/	200; 201
I39	Machines for metal processing	/	202; 322
I40	Industrial piping networks	/	267
I41	Membrane filters	/	272
I42	Potentially explosive atmospheres	/	305
I43	Hydrogen energy	197	/
I44	Nanotechnologies	229	352
I99	Undetermined	/	CEN/CLC/JTF PE; CEN/CLC/TC 2; 65, 157; CEN/WS 059

## Sector M: Metallic materials
