**Title :** Ethics of organizations management system. Requirements

**Scope :** This Standard establishes the requirements for principles and methodologies for the implementation and maintenance of the organization's ethics management system, following a phased and structured process with the involvement of its internal and external stakeholders, initiated and upheld by the top management. Each organization, whether in the private or public sector, whether or not for profit, is encouraged to strengthen its value and reputation by applying this Standard. This Standard is not intended to define the values to be adopted by organizations, whose essence emerges from the organization's beliefs and management, nor provide specific mechanisms or instruments of the organization's ethics management system. By verifying compliance with the requirements of this Standard, the organization may require the certification of the organization's ethics management system, namely the elaboration and implementation of the code of ethics, the framing of ethics in the organization's strategy, in the planning of its activities in the short, medium and long term, in decision making and promotion at all levels of practices and behaviors appropriate to the ethical principles of the organization, as well as the assessment of the effectiveness of its management system for the purposes defined. Any declaration of compliance with this Standard may only concern the design and implementation of the organization's ethics management system.

## Subsector B01: FIRE PROTECTION

---

**Subsector :** B01 **Registration Date :** 2018-09-20  
**Organization :** ASI  
**Country :** Austria  
**Project ID :** 00027489/0001 **Project**  
**Established**  
**ICS :** 13.220.99, 13.340.60  
**National Ref :** ÖNORM F 1020/A  
**Title :** First aid salvage device for fire fighting purposes - Requirements, testing, maintenance - Additional requirements to ÖNORM EN 1498 and ÖNORM EN 1865-1 (Amendment)  
**Scope :** This ÖNORM deals with a first aid salvage device in which a rescue sheet (abseil sheet) and a sling are packed in a carrying case. For this devices, requirements for materials, specifications regarding the design and condition, provisions for testing and marking as well as provisions for the device holder are specified. In addition to the provisions of ÖNORM EN 1498 and ÖNORM EN 1865-1, this ÖNORM specifies additional requirements and designs for a first aid salvage device for use by fire and rescue services.

**Relatedness :**

**National :** New

---

**Subsector :** B01 **Registration Date :** 2018-09-20  
**Organization :** ASI  
**Country :** Austria

ICS : 91.140.10  
 National Ref : ÖNORM H 7510-1  
 Title : Checking of heating systems - Part 1: General requirements  
 Scope : This Austrian Standard enables the checking and evaluation of the energy efficiency and the emission performance of a heating system. This checking does not replace safety-related checkings, customer service or inspection works and type tests.

The Austrian Standard includes a section for general requirements as well as a section for requirements on inspection staff.

The classification of the Standard series ÖNORM H 7510 was changed from M to H to be in accordance with the covered subject "heating systems".

**ICS :** 27.190, 75.160.20  
**National Ref :** UNI1604951  
**Title :** Qualification of economic operators involved in the production chain of biofuels and bioliquids  
**Scope :** This standard defines a qualification scheme for organizations, here defined as "economic operators", involved in the production chain of biofuels, bioliquids and their intermediates and by-products produced in a sustainable way according with criteria defined by art. 17 of Directive 2009/28/EC (RED) and art. 1.6 of Directive 2009/30 (FQD) that adds art. 7ter "sustainability requirements for biofuels" into directive 98/70. The standard gives also requirements for the implementation of a traceability system that allows an organization to comply with the requirements of both the directives. This standard is applicable to a single organization and not for the qualification of the complete chain of custody. It is intended to be used within qualification schemes needed to verify the conformity to criteria defined by art. 18 of the RED. In order to make easier its application, it has to be considered as an integration, for all the aspects linked to the sustainability of products defined by the RED, of

---

existing qualification schemes for management systems (e.g. EN ISO 9001) if already adopted by the organizations. This standard does not define specific sustainability values or calculation methods, but requires that both values and methodologies, however defined, are managed by the organization in order to assure the conformity to the RED and FQD principles and to guarantee traceability and clearness.

**Title :** Vertical signs. Road delineators. Junction marker in plastic material. Characteristics, dimensions and test methods.  
**Scope :** This standard defines the particular characteristics, dimensions and test methods applicable to the vertical delineators made of plastic used in the road sides as a guidance for the road users.

The purpose of this standard is to define the characteristics to be met by junction markers used in road markers and to describe the test methods for verifying these characteristics.

This standard applies to junction markers made of polymeric material.

NOTE The junction markers that are the subject of this standard are not within the scope of EN 12899-3. Therefore, only the clauses of EN 12899-3 that are cited throughout the text of this standard are applicable.
